Introduction

Meet Detodocoin (DTCN), a token based on the Binance Smartchain network, Detodocoin allows you to buy products online and pay for services around the world easily and securely. With Detodocoin, you no longer have to worry about currency restrictions or excessive banking fees, simply use your DTCN to make your purchases and payments, and that's it! Furthermore, thanks to the blockchain technology on which Detodocoin is based, your Transactions are immutable and transparent, meaning you can be sure that your money is safe and your transactions are trustworthy.

This document provides information about Detodocoin and a brief explanation about the ecosystem that is sought to be proposed as a mechanism to boost the value of Detodocoin and create a community that has a sense of belonging to the token.

Likewise, the distribution of the currency and plans to strengthen the token ecosystem are explained, recognizing that the project being proposed is not something easily achievable without the correct investment and knowledge of possible risks when putting into action the development of the token and its ecosystem.

We take into account the approach of future developments as part of the ecosystem by the DETODOCOIN development team to allow greater acceptance of our token as a means of payment and economic growth for our community.

Mission

Our mission is to provide a secure, fast and easy way for people to buy products and pay for services online around the world. We strive to be leaders in the adoption and use of blockchain technology, and are committed to providing an exceptional user experience to our customers.

Vision

Our vision is to become the preferred online payment option worldwide, offering an easy and secure solution for those looking for an alternative to traditional payment methods. We want to make cryptocurrencies accessible to everyone.

Token Description

Detodocoin is specially designed to achieve an ecosystem of payment for services or products for its community, allowing it to make massive use of the token in a decentralized way, thus achieving a positive impact for both the project and the members of the ecosystem.

The members of our community will use our token for different transactions, such as purchases, sales or exchanges of products or services, each of our future projects is planned to give way to the increase in transactions between those who join the ecosystem and give usability to the token. Detodocoin seeks to have a positive impact using affordable investment as a tool for all types of people, not necessarily only experts on the subject of cryptocurrencies or tokens.

The need to make Detodocoin known in different areas of the crypto world is recognized, therefore, the management of different tools such as exchanges, wallets, price trackers and others will be sought, in order to be able to provide a better image about the project and also greater security on more important issues such as the management of the ecosystem in the future, also allowing community participation in certain decisions in order to improve as a project and have even greater acceptance.

Underlying Technology

Detodocoin is a bep20 token created on the BNB chain network (previously known as Binance smartchain) and has all the characteristics of the consensus mechanism of this network which uses a hybrid mechanism called PoSA (Proof-of-Staked Authority). It combines elements of PoA (Proof-of-Authority) and PoS (Proof-of-Stake). In this system:

- **Validators:** A set of validators are selected to create blocks and confirm transactions based on a combination of factors, including the number of tokens they are willing to "stake" as collateral.
- **Security:** Validators have incentives to act honestly. If they act maliciously, the tokens they have staked as collateral may be confiscated.
- **Efficiency:** Because a small pool of validators is selected, BSC can achieve faster block times (around 5 seconds) compared to blockchains like Ethereum.

Security

We will mention a series of features that are found in the token code and why they allow DTCN to be a secure and reliable token.

BEP20 Token: The token follows the BEP20 standard, ensuring compatibility with any platform, wallet or exchange that supports BEP20 tokens.

SafeMath: The SafeMath library is used to prevent arithmetic overflows and overflows.

Token Burning: The "burn" functionality allows users to destroy (burn) their tokens, thereby reducing the total supply in circulation.

Safe: Provides safe methods for interacting with other BEP20 contracts, especially for calling functions that do not return a value.

Ownership (Ownable): The contract has an ownership feature, which allows the owner of the contract to perform specific functions, such as transferring ownership.

Approval Mechanism:Users can approve others to spend tokens on their behalf, useful for certain decentralized applications and smart contracts.

Contract Verification:The address library is used to determine whether a specific address is a contract.

Secure Low Level Calls:Provides secure functions for making low-level calls to other contracts.

Fixed Supply:The currency has a fixed supply of 1 billion tokens that are minted at the creation of the contract, therefore, an uncontrolled minting of tokens on the network is avoided, avoiding a deflation in prices due to oversupply.

Events:Transfer and Approval events are emitted by the contract to notify applications and front-ends about token transactions and approvals.

Technical characteristics

- Name: Detodocoin
- Identifier: DTCN
- Decimals: 18
- Network: SmartChain
- Standard: Bep20
- Maximum coins: 1,000,000,000

Economic model

Distribution model

Initial Sale

The initial DTCN sale will consist of tokens offered on exchanges and swaps. A total of 600 million tokens will be offered for sale, of which 50 million will be offered in a private sale.

Tokens for exchanges

The team has a quantity of 50 million tokens that will be used for testing and market management when the token is listed on an Exchange or wallet, therefore, they will be released gradually since they depend on listings and tests.

Future token release

These tokens will be locked and released gradually over a 4-year time period (75 million annually), which will be released to the market on a semi-annual basis (37.5 million) to align the team's incentives with those of the community and investors will be considers a blocking period of 1 year before the release begins, therefore this release of tokens would begin in 2025.

There are 300 million coins in total.

Rewards and Partnerships Program

To encourage developers, content creators, and form strategic partnerships. These tokens can be distributed based on the contribution and value brought to the ecosystem.

50 million coins in total.

Remaining tokens

Initially, 650 million tokens will be released to the market; after this release, a semiannual release of 75 million tokens is planned to allow the total circulation of the 1,000 million tokens in 2027.

Explanation of projects and services initially offered by DTCN

Services

These services seek to improve our customers' experience and offer convenience and versatility, seeking to strengthen and expand the Detodocoin ecosystem. By encouraging their adoption and practical use, bridges are established between the digital world of cryptocurrencies and the tangible needs and desires of everyday life, fluidly integrating both worlds for the benefit of DTCN users, these services are those that will be offered Initially, it should be highlighted that as the project progresses and the community grows, more services will be implemented.

Web design

Within the framework of development and evolution of the Detodocoin ecosystem, web design emerges as a critical component for our value proposition. Web design is not simply a matter of aesthetics, but encompasses the creation and comprehensive structuring of digital platforms for the token. This structure includes dimensions such as the user interface, optimized navigation, the color palette consistent with our brand identity, legible fonts and the efficient incorporation of images and multimedia, offering the following benefits:

- **Professionalism and Credibility:** A proper web design projects a professional image, which can increase user trust in Detodocoin.
- **Usability:** An easy-to-navigate site can improve the user experience, encouraging use and adherence to projects.
- **Mobile Optimization:** A responsive design ensures that mobile users have a seamless experience, opening your project to a wider audience.

Image Design

Our image design service covers the creation and graphic design of images that represent your brand or product. This includes logos, banners, infographics, social media graphics and other visual materials, you would have the following benefits when working with Detodocoin:

- **Brand identity:** A coherent graphic design creates a strong visual identity for your project, making it easily recognizable in the market.
- **Visual Appeal:** Well-designed images capture attention and can make content related to your project more shareable, increasing its visibility.
- **Efficient communication:** Through design, complex concepts can be transmitted in a simple and direct way, facilitating the understanding of what your project offers.

Online store

Our online store allows users to purchase products using DTCN as a payment method. You can browse catalogs, select products, add them to a cart and finally make a purchase, all digitally, having the following benefits:

- **Practical Use:** By allowing transactions with DTCN, users are encouraged to use the currency in day-to-day transactions.
- **Greater Adoption:** BY paying using DTCN you can attract new users to the ecosystem and motivate other merchants to do the same.
- **Costs reduction:** Cryptocurrency transactions can have lower fees compared to other payment systems, which can be beneficial for both sellers and buyers.
- **Global Transactions:** Using DTCN, the store can accept payments from anywhere in the world without worrying about exchange rates or geographic restrictions.

Cell Phone Recharges

The possibility of recharging mobile phones using DTCN is presented as an innovative solution in the world of telecommunications. Users no longer rely solely on traditional currencies or bank cards to keep their devices active. With just a few clicks and instantly, users can convert their DTCN into credit

for their mobile phones, regardless of the telephone company with which they are affiliated. We guarantee the following benefits when using our cell phone recharge service*

- **Accessibility:** Users do not require banking intermediaries to recharge, which is particularly useful in regions with low banking coverage.
- **Immediacy:** Transactions with DTCN are typically fast, allowing users to top up their balance in a matter of minutes.
- **Expanding Use of DTCN:** By offering everyday services payable with DTCN, greater adoption and circulation of the cryptocurrency is promoted.
- **Costs reduction:** Commissions associated with recharges by other means can be eliminated or significantly reduced.

*The cell phone recharge service will initially be offered in the territory of Colombia.

Purchase of Gift Cards

Gift cards have become a preferred option for many when giving as gifts. Allowing the purchase of these cards using DTCN not only offers a new acquisition method, but also expands the possibilities of use of our token. Whether a user wants to buy a gift card for a fashion store, a streaming service, or a restaurant, with DTCN you can do it in a simple and direct way, transforming the token into a real and tangible gift, therefore, this service presents the following benefits for our ecosystem:

- **Versatility:** Users can convert their DTCN into gift cards from a wide variety of sectors and services.
- **Last Minute Gift Solution:** Gift cards purchased with DTCN can be the perfect solution for last-minute gifts, avoiding the complications of choosing a physical gift.
- **Digitalization and Sustainability:** By favoring electronic gift cards, the need to produce physical cards is reduced, which can have a positive environmental impact.

NFT creation:

We offer a service for creating, selling and purchasing non-fungible tokens (NFTs) using DTCN as a means of payment, you can create your NFTs with us for art, music, collectibles, etc. Acquiring the following benefits:

- **Promotion of Creativity:** We seek to give artists and creators a new way to monetize their work.
- **Authenticity:** NFTs guarantee the originality of the works, protecting the rights of the creators.
- **New markets:** Open your art to a growing and popular industry in the crypto world.

Projects

In the dynamic and vast world of cryptocurrencies, cultivating and nurturing a token's ecosystem transcends mere digital existence; becomes an essential strategy for its relevance and longevity. The implementation of projects not only adds practical value that encourages their daily adoption, but also provides stability and credibility, strengthening trust in the market. Through diversification, our token can protect itself from vulnerabilities, while strengthening and fostering an active and engaged community, which often becomes its main advocate and promoter. Staying innovative and evolving with current trends ensures the freshness and relevance of our token, while the ability to generate tangible real-world impacts cements its essential value and purpose in people's everyday lives. At its core, active project onboarding is more than just a growth drive; It is an imperative guarantee of purpose, community and lasting value in the competitive cryptocurrency market.

The projects proposed below will be implemented little by little; it should be noted that as the project progresses, more projects will arrive, this is because we seek to innovate and create an ecosystem with solid foundations.

Own Wallet:

The Detodocoin team wants to create a digital wallet or wallet designed specifically to manage the token, which provides a secure and efficient

platform to store, send and receive DTCN, with an intuitive interface and additional features, having the following benefits:

- **Custom Security:** The wallet will be designed taking into account the particularities of the DTCN ecosystem, offering optimized security measures.
- **User Experience:** A friendly interface facilitates daily use and adoption by new users.
- **Advanced Features:** Tools like transaction trackers and charts allow for better tracking and management of funds.

APIs for Merchants:

We want other online stores to accept DTCN through an easy-to-integrate API such as a coinpayment listing, allowing the following benefits to be generated:

- **Mass Adoption:** Facilitate more merchants to accept DTCN, expanding its use.
- **Simple Integration:** Designed to be easy to install and configure, minimizing barriers for merchants.
- **Fast and Economical Transactions:** DTCN transactions may offer faster processing times and lower fees.

Education:

As a project we want to provide a platform or set of educational resources to help new users understand cryptocurrency, encourage our community to have knowledge about the world of cryptocurrencies through the use of courses or workshops.

- **Safe Use Promotion:** Safety education reduces risks to users.
- **Greater Adoption:** By understanding DTCN better, more people could feel comfortable using it.
- **Informed Community:** An educated user base can contribute positively to the ecosystem.

Cryptocurrency ATMs:

In the future we want to be able to install ATMs where people can buy or sell their DTCN in exchange for local currencies, having the following benefits.

- **Physical Access:** Provides a tangible point of interaction for users, bringing the digital world closer to the physical one.
- **Immediate Liquidity:** Allows quick conversion between DTCN and traditional currencies.
- **Geographic Expansion:** The presence of ATMs in different locations can increase the visibility and adoption of DTCN.

Online store

The project has an e-commerce platform where different types of products can be purchased using DTCN. We want the token community to have the following benefits:

- **Practical Use:** Encourages the use of DTCN in everyday transactions.
- **Product Diversity:** We offer a wide range of products, from technology to fashion, encouraging the use of DTCN.
- **Secure Transactions:** We guarantee a safe and reliable shopping experience.

Donations:

At Detodocoin, our vision transcends beyond being a mere digital ecosystem. We are resolutely committed to being a driving force driving wellbeing and positivity in our community and society at large. We firmly believe that technology, when used purposefully, can be a powerful tool for change. Therefore, we have enabled a mechanism by which both our loyal community and project members can contribute directly to charitable causes and social projects, all through DTCN*. This initiative reflects our intrinsic desire to make the world a fairer and more pleasant place, reaffirming that Detodocoin is not only a technological innovation, but also a catalyst for social good.

*Donations will be made as events announced on the Detodocoin website, initially they will cover the territory of Colombia, although we hope to be able to reach more territories.

Development Plan and Roadmap

Detodocoin emerged as an idea in January 2022, we created the token in February 2022, due to brainstorming and the search for talents, the project officially began in January 2023 and the development of a website began in April 2023. Therefore, since that month, the implementation of DTCN in token pocket began (April 2023) to allow better use of the token on mobile devices and facilitate its acceptance in the community, we added the first products to the store (April 2023), In July 2023 DTCN was listed on its first Exchange, due to internal problems the project took a few months on hiatus but the important history of the project is described in a few steps at the time of this summary, even so it entails many hours of meetings, rains of ideas, proposals and tests, we have more future plans for DTCN

- DTCNmarket launch: October 2023
- Expansion of product categories in the store: November 2023
- Nexdax Listing: March 2024
- Listed on 5dax: March 2024
- Listing in price followers: April 2024
- Implementation of DTCN payment gateway in the store: August 2024
- Start of development of the Mobile application: March 2025
- Listing on Binance Exchange: June 2025

The dates presented may be subject to change by an external agent, or new events may be added.

Risks

It is acknowledged and accepted that there are numerous risks associated with exchanging, holding, and using the Detodocoin token.

Regulations and actions of uncertain application

The regulatory situation for Detodocoin and distributed technology is unclear or unstable in many jurisdictions. It is impossible to predict how,

when or if regulatory agencies may apply existing regulations or create new regulations regarding that technology and its applications. Regulatory actions could negatively affect Detodocoin in several ways. At the behest of a wide range of legal advisors and ongoing analysis of the development and legal structure of virtual currencies and their ecosystems.

Detodocoin will therefore be able to constantly adjust the exchange strategy in order to avoid relevant legal risks as much as possible.

Competitors

It is possible that tokens are developed that could establish or use the same or similar strategy of Detodocoin and try to create similar facilities, these could affect Detodocoin and its ecosystem in the market.

Loss of Talent

The development of the Detodocoin ecosystem depends on the continuous cooperation of the teams that make up its ecosystem, who are highly trained in their respective sectors. The loss of any member may negatively affect Detodocoin or its development in future plans.

Failure in development

There is a risk that the development of planned portions of the Detodocoin ecosystem may not be executed as planned, for a variety of reasons, including, without limitation, the event of a decline in the prices of any digital asset, unforeseen technical difficulties or the shortage of funds for the development of activities.

Security flaws

Hackers or other malicious groups or organizations may attempt to interfere with Detodocoin and its related projects in a variety of ways, including, but not limited to, consensus-based attacks, or spoofing. Furthermore, there is a risk that a third party or a member of the project or its affiliates could intentionally or unintentionally introduce weaknesses in the core infrastructure of Detodocoin, which could negatively affect the coin.

Other risks

In addition to the aforementioned risks, there are other risks associated with the possession and use of Detodocoin. Such risks may also materialize as unforeseen variations or combinations of the aforementioned risks. Complete due diligence must be carried out on the project, its affiliates and the Detodocoin team, as well as understanding the overall framework and vision for Detodocoin prior to the exchange.

Disclaimer

This document is a descriptive concept of the project, but does not constitute a sale or investment obligation for Detodocoin or future related projects, securities or other products controlled by third parties.

This document cannot serve as a prospectus or any other form of standardized contract document, nor is it investment advice that constitutes a recommendation or solicitation of securities or any other controlled product in any jurisdiction.

Any information or analysis presented herein does not constitute investment advice, nor does it make any specific biased recommendations.

You should seek all necessary professional suggestions:

- 1) We make no representations and warranties regarding the accuracy or completeness of any content described herein or any other content published in any other way in connection with the project.
- 2) Without preconditions, we cannot make any representations and warranties regarding the compliance or reasonableness of any forward-looking or conceptual statements.
- 3) We will not bear any loss of tokens that arise due to ignorance of the management of wallets or exchanges.

Conclusion

Since its inception, Detodocoin (DTCN) has not been just another token in the vast sea of cryptocurrencies. It is the fruit of a clear and determined vision: to offer a solution that is both innovative and practical, built on solid

ethical principles and an unwavering commitment to our community and the world at large. Every phase of our development, from the first brainstorm to the detailed execution of our projects, reflects our mission to transform the financial and technological landscape for the better.

The future of DTCN is promising. With a clear roadmap, a dedicated team, and an ever-growing community, we are on our way to establishing a significant presence in the cryptocurrency space. But beyond the numbers and milestones, our true metric of success lies in the positive impact we can generate, the lives we can touch, and the transformation we can lead.

We invite all readers, whether investors, technology enthusiasts, or simply curious, to join us on this exciting journey. Together, we can not only change the world of cryptocurrency, but also contribute to a more inclusive, fair and sustainable future for all.

Thanks

Detodocoin mainly wants to thank all the investors for believing and supporting this project and the ecosystem that is being created, without their work and contributions the success of Detodocoin cannot be possible.

We also want to thank each person who participated in the creation stage of the currency and the first purchases of the token, these first tokens are in fact a reflection of the trust we have in the project and it is something that motivates us to improve along the way, to be able to meet our goals and support our community that will grow over time, since Detodocoin is not a token created to enrich a single person but to be able to provide an ecosystem that allows each member to find growth and well-being.

Last but not least we want to thank the design and development teams, the support and vision they provided to the project was something we needed to deliver a quality project, their ideas were that something that helped us direct the project and focus on what we wanted Detodocoin to represent.
