WHITEPAPER v1.1
2023

Content

Introduction

Welcome to Detodocoin (DTCN), a token based on the Binance Smartchain network, Detodocoin allows you to buy products online and pay for services around the world easily and securely. With Detodocoin, you no longer have to worry about currency restrictions or excessive bank commissions, simply use your DTCN to make your purchases and payments, and that's it! Also, thanks to the blockchain technology on which Detodocoin is based, your Transactions are immutable and transparent, which means you can be sure that your money is safe and your transactions are trustworthy.

This document provides information about Detodocoin and a brief explanation about the ecosystem that is sought to be proposed as a mechanism to boost the value of Detodocoin and create a community that has a sense of belonging to the token.

Likewise, the distribution of the coin is explained, plans to strengthen the token ecosystem, recognizing that the project that is being considered is not something easily achievable without the correct investment and knowledge of possible risks when putting into action in the development of the token. token and its ecosystem.

We take into account the approach of future developments as part of the ecosystem by the DETODOCOIN development team to allow greater acceptance of our token as a means of payment and economic growth for our community.

Mission

Our mission is to provide a safe, fast and easy way for people to buy products and pay for services online around the world. We strive to be a leader in the adoption and use of blockchain technology, and we are committed to providing an exceptional user experience for our customers.

Vision

Our vision is to become the preferred online payment option around the world, offering an easy and secure solution for those looking for an alternative to traditional payment methods. We want to make cryptocurrency accessible to everyone.

Token Description

Detodocoin is specially designed to achieve a payment ecosystem for services or products for its community, allowing it to make massive use of the token in a decentralized way, thus achieving a positive impact for both the project and the members of the ecosystem.

The members of our community will use our token for different transactions, such as purchases, sales or exchanges of products or services, each of our future projects is planned to give way to the increase in transactions between those who join the ecosystem and give usability to the token. Detodocoin seeks to have a positive impact using affordable investment as a tool for all kinds of people, not necessarily just experts on the subject of cryptocurrencies or tokens.

The need to make Detodocoin known in different areas of the crypto world is recognized, therefore, the management of different tools such as exchanges, wallets, price trackers and others will be sought, in order to be able to give a better image about the project and likewise greater security on more important issues such as ecosystem management in the future, also allowing community participation in certain decisions in order to improve as a project and have even greater acceptance.

Underlying Technology

Detodocoin is a bep20 token created in the BNB chain network (formerly known as Binance smartchain) it has all the characteristics of the consensus mechanism of this network which uses a hybrid mechanism called PoSA (Proof-of-Staked Authority). It combines elements of PoA (Proof-of-Authority) and PoS (Proof-of-Stake). In this system:

> **Validators:**A set of validators is selected to create blocks and confirm transactions based on a combination of factors, including the number of tokens they are willing to "stake" as collateral.

> **Security:**Validators have incentives to act honestly. If they act maliciously, the tokens they have staked as collateral may be confiscated.

> **Efficiency:**Because a small pool of validators is selected, BSC can achieve faster block times (around 5 seconds) compared to blockchains like Ethereum.

Security

We will mention a series of features found in the token code and why they allow DTCN to be a secure and trusted token.

BEP20 Token: The token follows the BEP20 standard, ensuring compatibility with any platform, wallet or exchange that supports BEP20 tokens.

SafeMath: The SafeMath library is used to prevent overflows and arithmetic underflows.

Token burn: The "burn" functionality allows users to destroy (burn) their tokens, thus reducing the total supply in circulation.

Safe: It provides safe methods to interact with other BEP20 contracts, especially to call functions that do not return any value.

Property (Ownable): The contract has an ownership feature, which allows the contract owner to perform specific functions, such as transfer ownership.

Approval Mechanism: Users can approve others to spend tokens on their behalf, useful for certain decentralized applications and smart contracts.

Contract Verification: The address library is used to determine if a specific address is a contract.

Secure Low Level Calls: It provides secure functions to make low-level calls to other contracts.

Fixed Supply: The coin has a fixed supply of 1 billion tokens that are minted at contract creation, thus avoiding uncontrolled minting of tokens on the network, avoiding price deflation due to oversupply.

Events: Transfer and Approval events are emitted by the contract to notify applications and front-ends about token transactions and approvals.

Technical characteristics

- Name: Detodocoin
- Identifier: DTCN
- Decimals: 18
- Network: SmartChain
- Standard: Bep20
- Maximum coins: 1,000,000,000

Economic model

Distribution model

Initial Sale
- ➤ **Private Sale (15 million DTCN):**This pre-sale period for strategic and institutional investors, offering them a slightly reduced price in exchange for a commitment not to sell the token for a certain period (for example, a 6-month lock).
- ➤ **Public Sale (35 million DTCN):**It will take place on September 7. Participants will be able to buy DTCN up to the established limit or until all tokens are sold.

50 million coins will be sold in total.

Team Reserve
These tokens will be locked up and released gradually over a 4 year period of time (37.5 million annually) to align team incentives with those of the community and investors a 1 year lock up period is considered before release begins therefore this release of tokens would start in 2025.

There are 150 million coins in total.

Rewards and Partnerships Program
To incentivize developers, content creators, and form strategic partnerships. These tokens can be distributed based on the contribution and value brought to the ecosystem.

80 million coins in total.

Remaining tokens
Initially, 200 million tokens will be released to the market in November 2023, after this release, a quarterly release of 50 million tokens is planned 6 months after the official launch of the token.

Explanation of projects and services initially offered by DTCN

Services

These services seek to improve the experience of our clients and offer convenience and versatility, seeking to strengthen and expand the Detodocoin ecosystem. By encouraging its adoption and practical use, bridges are established between the digital world of cryptocurrencies and the tangible needs and desires of everyday life, seamlessly integrating both worlds for the benefit of DTCN users, these services are the ones that will be offered Initially, it should be noted that as the project progresses and the community grows, more services will be implemented.

Web design

Within the framework of development and evolution of the Detodocoin ecosystem, web design emerges as a critical component for our value proposition. Web design is not simply a matter of aesthetics, but encompasses the creation and comprehensive structuring of digital platforms for the token. This structure includes dimensions such as the user interface, optimized navigation, the color palette consistent with our brand identity, legible fonts and the efficient incorporation of images and multimedia, offering the following benefits:

- ➢ **Professionalism and Credibility**: Proper web design projects a professional image, which can increase user confidence in Detodocoin.
- ➢ **usability**: A site that is easy to navigate can improve the user experience, encouraging use and adherence to projects.
- ➢ **Optimization for Mobile Devices**: A responsive design ensures mobile users have a seamless experience, opening your project to a wider audience.

Image Design

Our image design service covers the creation and graphic design of images that represent your brand or product. This includes logos, banners, infographics, graphics for social networks and other visual materials, you would have the following benefits when working with Detodocoin:

➤ **Brand identity**: A consistent graphic design creates a strong visual identity for your project, making it easily recognizable in the market.
➤ **visual appeal**: Well-designed images capture attention and can make content related to your project more shareable, increasing its visibility.
➤ **Efficient communication**: Through design, complex concepts can be transmitted in a simple and direct way, facilitating the understanding of what your project offers.

Online store

Our online store allows users to purchase products using DTCN as a means of payment. You can browse catalogs, select products, add them to a cart and finally make a purchase, all digitally, having the following benefits:

➤ **practical use**: By allowing transactions with DTCN, users are encouraged to use the currency in day-to-day transactions.
➤ **Widest Adoption**: By paying using DTCN it is possible to attract new users to the ecosystem and motivate other merchants to do the same.
➤ **Costs reduction**: Cryptocurrency transactions can have lower fees compared to other payment systems, which can be beneficial for both sellers and buyers.
➤ **Global Transactions**: By using DTCN, the store can accept payments from anywhere in the world without worrying about exchange rates or geographic restrictions.

Mobile recharges

The possibility of recharging balance on mobile phones using DTCN is presented as an innovative solution in the world of telecommunications. Users no longer rely solely on traditional currencies or bank cards to keep their devices active. With just a few clicks and instantly, users can convert their DTCN into balance for their mobiles, regardless of the telephone

company with which they are affiliated, we guarantee the following benefits when using our mobile recharge service*

- ➢ **Accessibility**: Users do not require bank intermediaries to make top-ups, which is particularly useful in regions with low banking usage.
- ➢ **immediacy**: Transactions with DTCN are usually fast, allowing users to top up their balance in a matter of minutes.
- ➢ **Expanding the Use of DTCN**: By offering everyday services payable with DTCN, it promotes greater adoption and circulation of cryptocurrency.
- ➢ **Costs reduction**: Commissions associated with top-ups by other means can be eliminated or significantly reduced.

*the mobile recharge service will initially be offered in the territory of Colombia.

Purchase of Gift Cards

Gift cards have become a preferred option for many when giving gifts. Allowing the purchase of these cards using DTCN not only offers a new method of acquisition, but also expands the possibilities of using our token. Whether a user wants to buy a gift card for a fashion store, a streaming service, or a restaurant, with DTCN you can do it simply and directly, transforming the token into a real and tangible gift, therefore, this service presents the following benefits for our ecosystem:

- ➢ **Versatility**: Users can convert their DTCN into gift cards for a wide variety of industries and services.
- ➢ **Last Minute Gift Solution**: Gift cards purchased with DTCN can be the perfect solution for last-minute gifts, avoiding the hassle of choosing a physical gift.
- ➢ **Digitization and Sustainability**: By favoring electronic gift cards, the need to produce physical cards is reduced, which can have a positive environmental impact.

NFT creation:

We offer a service of creation, sale and purchase of non-fungible tokens (NFTs) using DTCN as a means of payment, you can create your NFTs with us for art, music, collectibles, etc. Acquiring the following benefits:

> **Fostering Creativity**: We seek to give artists and creators a new way to monetize their work.
> **Authenticity**: The NFTs guarantee the originality of the works, protecting the rights of the creators.
> **New markets**: Open your art to a growing and popular industry in the crypto world.

Projects

In the vast and dynamic world of cryptocurrencies, cultivating and nurturing a token's ecosystem transcends mere digital existence; it becomes an essential strategy for its relevance and longevity. The implementation of projects not only adds a practical value that encourages its daily adoption, but also provides stability and credibility, strengthening confidence in the market. Through diversification, our token can protect itself from vulnerabilities, while also strengthening and nurturing an active and engaged community, which often becomes its main advocate and promoter. Staying innovative and evolving with current trends ensures the freshness and relevance of our token, while the ability to generate tangible impacts in the real world consolidates its essential value and purpose in people's daily lives. In essence, the active incorporation of projects is more than just a growth boost; it is an imperative guarantee of purpose, community and lasting value in the competitive cryptocurrency market.

The projects that are proposed below will be implemented little by little, it should be noted that as the project progresses, more projects will arrive, this is because we seek to innovate and create an ecosystem with solid foundations.

Own Wallet:

The Detodocoin team wants to create a digital portfolio or wallet specifically designed to manage the token, which provides a secure and efficient platform to store, send and receive DTCN, with an intuitive interface and additional features, having the following benefits:

> **Custom Security**: The wallet will be designed taking into account the particularities of the DTCN ecosystem, offering optimized security measures.
> **User Experience**: A friendly interface facilitates daily use and adoption by new users.
> **Advanced Features**: Tools like transaction trackers and charts allow for better tracking and management of funds.

Merchant APIs:

We want other online stores to accept DTCN through an easy to integrate API such as a coinpayments listing, allowing the following benefits to be generated:

> **mass adoption**: Make it easier for more merchants to accept DTCN, expanding its use.

> **Easy Integration**: Designed to be easy to install and configure, minimizing barriers for merchants.

> **Fast and Economic Transactions**: DTCN transactions may offer faster processing times and lower fees.

Education:

As a project we want to provide a platform or set of educational resources to help new users understand cryptocurrency, encourage our community to have knowledge about the world of cryptocurrencies through the use of courses or workshops.

> **Promotion of Safe Use**: Safety education reduces risks to users.

> **Widest Adoption**: By better understanding DTCN, more people could feel comfortable using it.

- ➤ **Informed Community**: An educated user base can positively contribute to the ecosystem.

Cryptocurrency ATMs:

In the future we want to be able to install ATMs where people can buy or sell their DTCN in exchange for local currencies, having the following benefits.

- ➤ **Physical Access**: Provides a tangible point of interaction for users, bringing the digital world closer to the physical one.
- ➤ **Immediate Liquidity**: Allows fast conversion between DTCN and traditional currencies.
- ➤ **Geographic expansion**: The presence of ATMs in different locations can increase the visibility and adoption of DTCN.

Online store

The project has an e-commerce platform where different types of products can be purchased using DTCN, we want the token community to have the following benefits:

- ➤ **practical use**: Promotes the use of DTCN in daily transactions.
- ➤ **Product Diversity**: We offer a wide range of products, from technology to fashion, encouraging the use of DTCN.
- ➤ **Secure Transactions**: We guarantee a safe and reliable shopping experience.

Donations:

At Detodocoin, our vision transcends beyond being a mere digital ecosystem. We are resolutely committed to being a driving force that drives well-being and positivity in our community and in society at large. We strongly believe that technology, when used purposefully, can be a powerful tool for change. Therefore, we have enabled a mechanism by which both our loyal community and project members can directly contribute to charitable causes and social projects, all through DTCN*. This initiative reflects our intrinsic desire to make the world a fairer and more pleasant place, reaffirming that Detodocoin is not only a technological innovation, but also a catalyst for social good.

*Donations will be made as events announced on the Detodocoin website, initially they will cover the territory of Colombia, although we hope to be able to reach more territories.

Development Plan and Roadmap

Detodocoin emerged as an idea in January 2022, we created the token in February 2022, due to brainstorming and the search for talent, the project officially began in January 2023 and the development of a website began in April 2023. Therefore, since that month the implementation of DTCN in token pocket began (April 2023) to allow better use of the token on mobile devices and facilitate its acceptance in the community, we added the first products to the store (April 2023), in July 2023 DTCN was listed on its first Exchange, the history of the project is described in a few steps at the time of writing this summary, even so it takes many hours of meetings, brainstorming, proposals and tests, we have more future plans for DTCN

- Listing on Price Followers: August 2023
- DTCN Private Sale to Potential Investors: August 25 to September 8, 2023
- DTCN Launch Event in Bogotá: September 24, 2023
- DTCN announcement event in Cartagena: October 7, 2023
- Second Exchange Listing: October 2023
- Expansion of product categories in the store: October 2023
- DTCN announcement event in Mexico: November 7, 2023
- Educational Webinars: Online sessions to educate stakeholders about DTCN and its ecosystem. December 1 to 5, 2023.
- DTCN Announcement Event at DTCN Dubai: December 7, 2023
- First donation event to foundations: December 2023
- Start of development of the Mobile application: January 2024
- Third Exchange Listing: February 2024

The dates presented may be subject to changes by an external agent, or new events may be added.

Token Sale Details

Private sale of tokens to investors

A private sale of 15 million tokens will be held to a group of invited investors. This sale will take place from August 25, 2023 to September 8, 2023 or earlier if all the tokens are sold. To participate in this pre-sale, you will send an invitation from the members of the DTCN team via message on social networks or email.

Sale at events

35 million tokens will be offered for sale within the different events, if the tokens are sold in full before November, you will have to wait until the 200 million additional tokens are released to participate in this series of events. sales, anyone can communicate with the DTCN communication team, purchase them through the use of Exchange or during events (if you purchase them at events you will get some surprises) in the different cities that appear on our website.

Risks

It is acknowledged and accepted that there are numerous risks associated with the Detodocoin exchange, holding, and use of the token.

Regulations and actions of uncertain application

The regulatory situation for Detodocoin and distributed technology is unclear or unstable in many jurisdictions. It is impossible to predict how, when or if regulatory agencies may enforce existing regulations or create new regulations regarding that technology and its applications. regulatory actions could negatively affect Detodocoin in several ways. At the behest of a wide range of legal advisors and ongoing analysis of the development and legal structure of virtual currencies and their ecosystems.

Therefore, Detodocoin will be able to constantly adjust the exchange strategy in order to avoid the relevant legal risks as much as possible.

Competitors

It is possible that tokens are developed that could establish or use the same or similar strategy of Detodocoin and try to create similar facilities, these could affect Detodocoin and its ecosystem in the market.

Loss of Talent

The development of the Detodocoin ecosystem depends on the continuous cooperation of the teams that make up its ecosystem, which are highly trained in their respective sectors. The loss of any member may negatively affect Detodocoin or its development in future plans.

Development failure

There is a risk that the development of planned portions of the Detodocoin ecosystem will not execute as intended, for a variety of reasons, including, without limitation, the event of a decline in the prices of any digital asset, unforeseen technical difficulties, or the scarcity of funds for the development of activities.

Security flaws

Hackers or other malicious groups or organizations may attempt to interfere with Detodocoin and its related projects in a variety of ways, including, but not limited to, consensus-based attacks, or spoofing. On the other hand, there is a risk that a third party or a member of the project or its affiliates may intentionally or unintentionally introduce weaknesses into Detodocoin's core infrastructure, which could negatively affect the coin.

Other risks

In addition to the aforementioned risks, there are other risks associated with the possession and use of the Detodocoin. Such risks may also materialize as unforeseen variations or combinations of the aforementioned risks. Complete due diligence should be carried out on the project, its affiliates and the Detodocoin team, as well as understanding the overall framework and vision for Detodocoin prior to trading.

Disclaimer

This document is a descriptive concept of the project, but does not constitute a sale or investment obligation for Detodocoin or future related projects, securities or other products controlled by third parties.

This document cannot serve as a prospectus or any other form of standardized contract document, nor is it investment advice that constitutes a recommendation or solicitation of securities or any other product controlled in any jurisdiction.

1) We do not make any representations or warranties regarding the accuracy or completeness of any content described in this document or any other content published in any other way in connection with the project.
2) Without preconditions, we cannot make any representations and warranties regarding the compliance or reasonableness of any forward-looking or conceptual statements.
3) We will not carry any loss of tokens that arises from ignorance of the management of wallets or exchanges.

Conclusion

Since its inception, Detodocoin (DTCN) has not been just another token in the vast sea of cryptocurrencies. It is the fruit of a clear and determined vision: to offer a solution that is both innovative and practical, built on strong ethical principles and an unwavering commitment to our community and the world at large. Every phase of our development, from the first brainstorms to the detailed execution of our projects, reflects our mission to transform the financial and technology landscape for the better.

The future of DTCN is bright. With a clear roadmap, a dedicated team, and an ever-growing community, we are well on our way to establishing a

significant presence in the cryptocurrency space. But beyond numbers and milestones, our true metric of success lies in the positive impact we can make, the lives we can touch, and the transformation we can lead.

We invite all readers, whether they are investors, technology enthusiasts, or simply curious, to join us on this exciting journey. Together, we can not only change the world of cryptocurrency, but also contribute to a more inclusive, fair and sustainable future for all.

Thanks

Detodocoin wants to thank mainly all the investors, for believing in and supporting this project and the ecosystem that is developing, without their work and contributions the success of Detodocoin cannot be possible.

We also want to thank each person who participated in the coin creation stage and the first purchases of the token, these first tokens are in fact a reflection of the trust in the project and it is something that motivates us to improve. along the way, to be able to meet our goals and support our community that will grow over time, since Detodocoin is not a token created to enrich a single person, but rather to be able to provide an ecosystem that allows each member to find growth and well-being.

Last but not least we want to thank the design and development teams, the support and vision they provided to the project was something we needed to deliver a quality project, their ideas were something that helped us direct the project and focus in what we wanted Detodocoin to represent.
